SHOP FASTER TO THE ULTIMATE LEVEL

WWW.ONLEVEL.COM

Our products can be mounted much more quickly and easily than those of competitors. Or, as we would put it: **simply onlevelicious**. You already know that for sure. But did you also know that our Online Shop is the coolest rocket in space? The power plant has fall protections, the control unit is equipped with railings and balustrades for the all-encompassing view from above and, of course, there are clamps for the payloads to make sure you sit firmly in the cockpit throughout your journey.

It can be experienced in seven languages and you need seven-league boots to cross its vast dimensions. In addition, it is highly adaptable. Whether on your desktop, tablet, or laptop – “**onlevel.com**” is always responsive and driven by rocket propulsion. Our Shop is available 24/7 to place your orders, retrieve all required technical information, and download application drawings as well as flyers and brochures. And we would definitely not call all this “simply onlevelicious” if our rocket did not have an easy-to-use configurator to give a real face to all your visions.

Immerse yourself in the fascinating world of our web shop. Here you can not only learn about and be inspired by the many advantages awaiting you, but you will also find all essential facts about our products and innovations.

HELLO AND WELCOME!

We at **ONLEVEL** do not believe that our products are particularly sexy. In addition, it is not really worth mentioning that we are specialized in innovative design balustrade systems and frameless glass balustrades, as there are other people who claim the same. However, has any product ever really opened your eyes with wonder?

Start with a clear vision

The facts simply speak for themselves. All our products can be mounted considerably faster and easier with the added value of an eye-opening effect: Our products do not only provide premium performance and support on steps and stairs, or offer protection on balconies and galleries – with **ONLEVEL** you can reach much further with your project.

Innovative and Individual. With an Eye-opening Effect.

With **ONLEVEL** you can create your individual design and combine the elements as you like: You can either choose the required components from one of our systems or combine products from our different lines. Our products are not only very versatile in use but undergo strict inspections by leading international supervisory bodies and hold the required quality labels and certificates of different countries. The CE label for stainless steel, aluminium, die-cast zinc and glass products is among them, of course!

We are sure you have already seen our modular balustrade systems somewhere: for example in public buildings, shopping centres, museums, sports stadiums or airports, now its your chance to use our innovations, too.

Increasing options

What a beautiful and stylish design. And so slimline at the same time. That´s what our TL 60 in combination with the Top Cover solution is like.

Higher safety

Point fixings by **ONLEVEL** with especially large radii for increased safety at the construction site and as of now, also adjustable versions. This is absolute madness.

Trans Level by ONLEVEL. Our Experience. Your Benefit.

You can find **ONLEVEL**'s long-standing experience reflected in our products. The **ONLEVEL** systems are always easy to install, safe and solution-oriented:

- | Always one step ahead. Almost all products are adjustable.
- | Very simple mounting and adjustment options accessible from the mounting side only, we care about installers' safety and time
- | Top Cover cover profiles for wall or floor connection
- | Drainage holes, we care about the long term success
- | Extension pin holes for simple and straight installation, perfect joints every time
- | Thick anodised layer with 25µ, therefore also suitable for use in chloride and seawater environments, perfect for the UK market
- | Packed individually with sturdy protective film and cardboard packaging, we care about professional presentation
- | Practically all inspections and certificates for Europe and North America with type-tested statics
- | Modular system enables the combination of different components
- | Different finishes (plain aluminium, stainless steel look, light alloy – mill finish, and coloured to any RAL)
- | Mounting and planning aids, we care about making things easy
- | CAD at www.onlevel.com

For more flexibility

Especially simple mounting in staircase areas – onto steel, concrete and wood especially when combined with our Glasstop.

WHAT THE HELL ARE WE DOING

WE'RE ONLEVEL

This is not just a slogan. This is our philosophy. This is the way we work. For our customers – so that no unanswered questions remain as far as the installation, quality and design of system applications for balustrades and glass hardware is concerned and everything remains transparent. The spark of enthusiasm will also jump over to you, as to all those working with our products. We generate this enthusiasm because we love what we do.

ONLEVEL was founded in 2000 as a steelwork company and has since become established as a full-service provider for balustrade systems. Since 2015, **ONLEVEL** has been represented at 4 locations and with approx. 200 partners in Germany and abroad on 5 continents.

The company is managed in partnership by Iwan Oude Luttikhuis and Marcus Lenge. Thanks to our Project and Trade divisions, designers, users and partners equally profit from our experiences and innovations.

Simply onlevelicious

Our customers experience innovative performance, passionate consultation and high implementation speed. The claim “start with a clear vision” forms part of our philosophy and is our mission at the same time: We have proven to the rather conservative construction industry that a new perception of things opens your eyes and sharpens your vision. Complexity decreases with every new development and every new product generation, which is a prerequisite for the corporate vision: [simply onlevelicious](#).

Our products can be mounted so much more quickly and easily than standard systems – that's your advantage. The quality of our products also searches for its match – as our products are very consciously developed in line with their practical application. The people we share this passion with are highly motivated, enjoy and give trust. As all of us know this, our products are that innovative, safe and transparent. Or, as we would put it: [simply onlevelicious](#).

ONLEVEL products shine with application possibilities in a timelessly elegant and classical design. Whether for windows, balconies, staircases, buildings, façades – **ONLEVEL** offers a system including floor profiles, floor-to-ceiling glazings, point fixing systems and innovative clamping solutions for innumerable applications.

This does not sound as sexy as it looks. Nevertheless, you can give this system your individual look and combine it just as the fancy takes you. With **ONLEVEL** you can create your individual design yourself and combine things as you like: You can either choose the required components from one of our systems or combine products from our different lines. Our products are not only very versatile in use but undergo strict inspections by leading international supervisory bodies and hold the required quality labels and certificates of different countries. The CE label for stainless steel, aluminium, die-cast zinc and glass products is among them, for example.

TOTAL TRANSPARENCY MEETS...

...a system of floor profiles and innovative clamping solutions for innumerable applications. This does not sound as sexy as it actually looks. You can give our system your look and combine it just as the fancy takes you: profiles, glass clamps and adapters with different handrails from aluminium, stainless steel and wood.

What sounds like a tongue-twister at first, opens up so many opportunities in a timelessly elegant and classical design: **frameless glass balustrades.**

They are suitable both for interior and exterior applications and you can choose between linear fixings with floor profiles or point fixings with glass adapters and glass clamps. In order to achieve total transparency, you can combine everything with round, square or oval handrails and have many additional advantages.

The cost factor:

The very easy installation saves time and money.

The safety factor:

National and international safety standards are guaranteed.

The flexibility factor:

Our comprehensive portfolio offers you so many possibilities.

Simply Individual Design. Ready. Steady. Go.

THE ONLEVEL END CAPS RIGHT AND LEFT.

Left Is Where Your Thumb Is On The Right.

The direction is always viewed from the fall side. Therefore you get it right when you are not on the balcony but in front of the building.

BETTER QUALITY. EXTREMELY ACCURATE. NO REWORKING.

Our products are made of steel, stainless steel V2A (304), V4A (outside) (316), light alloy up to steel of an especially high quality. We do not just use any plastic but thermoplastic and glass fibre reinforced polymers.

They are available in all reasonable shapes and the installation is as easy as can be, which saves you time and money. And what about design? Seems you can't open your eyes wide enough to see all of this beauty. Precisely tailored to your needs. Whether pre-assembled, cut or bent, **ONLEVEL** will prepare everything according to your wishes and preferences.

The material. Stainless steel AISI 304 (304), AISI 316 (exterior) (316)

Stainless steel V2A (304) is the normal industrial standard for interior applications. V4A (316) is primarily used for exterior applications and contains 2% of molybdenum ensuring high corrosion resistance. If you enjoy a magnificent sea view, our products are ideally suited for this purpose.

Of course, you can also use steel with a special protective coating. It is extremely **resilient** and even cost-effective. Our steel products

are predestined both for interior and exterior applications. A nickel sulphide layer protects them against corrosion. Apart from its functional, scratch resistant surface, steel with a protective coating is also suitable for powder coating: a congenial alliance between high wear resistance and a brilliant eye-catcher. And even cleaning is very easy: simply take warm water and soap – done!

Light alloy stands out due to its weight advantage and its high resilience at the same time. It is adequate both for interior and exterior applications. Its naturally occurring oxide layer protects it against corrosion. This protection has been additionally increased due to the so-called "anodising process" creating a layer thickness of 25µ, which means you are on the safe side in any wind and weather. Light alloy products can be cleaned with warm water and soap sud.

Die-cast zinc products are not only sturdy but also particularly economic. Nevertheless these products are susceptible to corrosion and should therefore be protected by a lacquer or coating and used for interior applications only. They can easily be cleaned with warm water and soap sud.

Attention: For batch and production related reasons, anodised aluminium surfaces may show differences in the surface finish. Within the scope of technical possibilities, **ONLEVEL** tries to keep these differences as small as possible. However, they cannot be ruled out completely. **Differences in the surface finish do therefore not constitute grounds for a complaint.**

ONLINE

ARMOUR - WE LOVE TO PROTECT YOU.

Hit by Armour's arrow, we have developed a new, impenetrable armour for the surfaces of our all-glass balustrades and windows. It was produced in ONLEVEL's sacred halls and is especially well suited for buildings in coastal areas. In such places, where the sea never ends and the sky begins, the extremely saline air relentlessly attacks all metal and coated surfaces.

Last digits .19 – this is your arrow for a protected surface.

The increased formation of corrosion particularly occurs close to the sea and sometimes even several kilometres inland. However, also health resorts and swimming pools with a higher salt content in the air may experience this phenomenon. Even ships are not immune to corrosion damage, for example on container locks. Apart from the visual aspect, Armour also has a safety-related function, which has been brought to life with great attention to detail in ONLEVEL's innovation hotbed.

ONLEVEL Armour – the armour for your surface.

ONLEVEL

COLOUR LINE

You can simply decide for yourself how you would like to receive your profiles in future. Whether mill finished, anodised, in stainless steel look or with a RAL colour coating, all conceivable variations and combinations are possible. Our plain profiles are mill finished in their standard version but ideally suited for a coloured coating layer. The elegant aluminium look moreover provides all the advantages light alloy has to offer. You can simply choose your favourite finish. Even combining different styles is possible.

Aluminium and Stainless Steel – Quality and Style

Whether aluminium or stainless steel – see for yourself which suits you best. Of course, here again, you can combine at pleasure. How about an aluminium balustrade with a stainless steel handrail, for example?

Mill Finished Profiles – The Revolution of Colour

You can either use mill finished plain profiles or mill finished profiles with a colourful coating. And there are no limits: You can order any colour you like and even have customised coatings (e.g. with your company logo) produced. Approximately 1 - 2 weeks must be added to the standard delivery time in this case, but for a change, you have your very own profile.

Surface finish code

- .13 RAL glossy
- .13-AG RAL 7016 glossy
- .13-TW RAL 9016 glossy
- .16 RAL structured matt
- .18 RAL matt
- .18-AG RAL 7016 matt
- .18-TW RAL 9016
- .19 **ARMOUR RAL**, powder coat surface protection

Example: You order your 16.1009.010.**16** profile and receive it with “structured matt” surface finish and a colour of your choice. If you’d like to learn more about our colour structures, you can order one of our colour charts – Art. no.: 81.1000.100.xx-xx at info@onlevel.com.

TL-1010

1.0 kN top mount

The Playmaker – better safe than sorry.

With the TL-1010 profile, you have every freedom. It knows the game both on the left and on the right, fits into the spatial depth and always keeps on top of things. Playmaker gives you two mounting possibilities in concrete. It is either cast in concrete (from above) ex works or it is inserted into the finished floor (from below).

As a matter of fact, there are a drainage channel, end caps with a drainage hose connection and extension pin channels.

Essential Features

- | Slimline, elegant design and low-maintenance
- | ONLEVEL FLEXFIT Glass Adjustment Tool
- | With integrated drainage
- | Cover (optional)
- | For glass thicknesses between 12 - 21.52 mm

Mounting in concrete

1.0 kN Top Mount

Your Choice. Our Power.

The TL-3010 F-profile – one of the most powerful products in the 1.0 kN application range. The model is very well suited for balconies and terraces – it enables an especially small edge distance and therefore gains valuable additional space on the deck itself. Moreover, this system is ideally suited for new installations under screed. Of course, the relevant distances between drill holes have been taken into account.

The F-profile can withstand a linear load of 1.0 kN and is suitable for glass thicknesses between 12 mm and 21.52 mm.

Essential Features

- | Slimline, elegant design and low-maintenance
- | **ONLEVEL** FLEXFIT Glass Adjustment Tool
- | Drainage holes
- | For glass thicknesses between 12 - 21.52 mm

TL-3020

1.5 kN Top Mount

Intelligent development.

Just like its little brother, the TL-3020 F-profile is an intelligent onward development and one of the most powerful products of the 1.5 kN system. Ideally suited for use under screed in new buildings, for example for balconies and terraces, the profile achieves an especially small edge distance thanks to its improved statics and thus gains additional space. Of course, we have also taken into account the relevant distances between drill holes.

The TL-3020 F-profile can withstand a linear load of 1.5 kN and is suitable for glass thicknesses between 12 mm and 21.52 mm.

Essential Features

- | Slimline, elegant design and low-maintenance
- | **ONLEVEL** FLEXFIT Glass Adjustment Tool
- | Drainage holes
- | Cover (optional)
- | For use with Top Cover 2.0 kN
- | Extension pin channels
- | For glass thicknesses between 12 - 21.52 mm

Hollow profile, therefore
more lightweight and more
economic

SHELL CONSTRUCTION TOLERANCES.

All things optional, nothing is a must.

When planning and mounting our systems, you should always keep in mind the shell construction tolerances. Our practical assembly experience gained on building sites teaches us that at times there can be deviations from the nominal dimensions. Unfortunately, this happens every now and then and cannot be avoided.

These deviations must not compromise the trouble free installation of our systems. The installation must be carried out on an even surface at a right angle. If this is not the case, you should definitely take corrective actions. If deviations in evenness are too big, they can usually be compensated for by relinings. On site for example, uneven walls may be levelled with the suitable mortar. It is especially important that possible relinings are pressure-resistant and applied over the entire surface – our shims (90.7012.012.10), e.g., may be very helpful in this case.

If you have further questions, our Support Team is always happy to assist you.

90.7012.012.10

**Levels up
to 6.5 mm**

TL-3021

1.5 kN Side Mount

Dimensional development.

The TL-3021 Y-profile is perfectly simple and simply perfect. This is the intelligent onward development of TL-3011 – with improved statics and an additional cover strip for the entire profile. The height adjustment option makes mounting as easy as can be. As a matter of fact, the profile is suited both for interior and exterior applications. It can withstand a linear load of more 1.5 kN and is appropriate for glass thicknesses between 12 mm and 21.52 mm.

Essential Features

- | Slimline, elegant design and low-maintenance
- | **ONLEVEL** FLEXFIT Glass Adjustment Tool
- | Extension pin holes
- | Drainage holes
- | Cover (optional)
- | Partial cover caps (optionally)
- | For use with Top Cover 2.0 kN
- | Diagonal connector as load support
- | For glass thicknesses between 12 - 21.52 mm

TL-3030

3.0 kN Top Mount

Front Row.

With the TL-3030 F-profile you sit in the front row. You have the best seat and the best view in the house. TL-3030 was designed to support highest loads and is suitable both for interior and exterior applications. It can withstand linear loads of more than 3.0 kN and is appropriate for glass thicknesses between 21.52 mm and 31.52 mm. It has an outstanding resilience and was kept as minimalistic as possible as far as the design is concerned. With TL-3030 you always hold the better cards.

Essential Features

- | Slimline, elegant design and low-maintenance
- | ONLEVEL FLEXFIT Glass Adjustment Tool
- | Drainage holes
- | For glass thicknesses between 21.52 - 31.52 mm

EXTENSION PIN.

The Extension of Elements.

Here **ONLEVEL** offers the perfect solution for a seamless connection between elements. And of course, we always remain faithful to our philosophy: An easier installation is impossible.

The extension pin is made of high quality V4A steel and is thus suitable both for interior and exterior applications. Pay attention to the logo indicating the suitable application types.

Extension pin for the
maximum length of your balustrade

TL-3031

3.0 kN Side Mount

The Power of Improvement.

The true muscle man among the all-glass balustrades. This is the profile which is most often used in highly frequented projects. No profile can be mounted faster. No profile requires less effort. Even strongest loads are no problem.

Like all profiles from ONLEVEL, TL-3031 can be used both in interior and exterior applications. It can withstand linear loads of more than 3.0 kN and is appropriate for glass thicknesses between 21.52 mm and 31.52 mm.

Essential Features

HEIGHT ADJUSTABLE MOUNTING BLOCK.

The Steady and Flexible Body.

We wouldn't be ONLEVEL, if we didn't work permanently for the further development of our products: We have enabled a more significant compensation of construction and mounting tolerances by taking optimum advantage of the opportunities provided by aluminium extrusions.

Therefore, the drill hole for fixing our glass support profiles does not need to be completely accurate any more, but has a tolerance of approx. 5 mm in each direction. In order to guarantee that the glass balustrade remains in place, the mounting block is equipped with teeth. In this way, a force-locked connection is achieved. Therefore always pay attention to the logo indicating the suitable application types.

Mounting block with teeth
for optimum side mount

TL-3120

1.0 kN Top Mount

At Eye Level.

Do you live in a kind of nuclear bunker and your ceiling structure is really high? Then TL-3120 is just right for you. Your problem solver for higher ceiling structures, with a profile height of 180 mm. Screed, insulation and concrete – and all of them very high – are no problem as TL-3120 conceals the entire construction and is exactly at eye level.

TL-3120 can withstand a linear load of 1.0 kN and is suitable for glass thicknesses between 12 mm and 21.52 mm.

Essential Features

- | Slimline, elegant design and low-maintenance
- | **ONLEVEL** FLEXFIT Glass Adjustment Tool
- | Cover (optional)
- | Extension pin channels
- | For use with Top Cover 2.0 kN
- | Integrated multifunctional sophisticated chamber
- | For higher floor structures
- | For glass thicknesses between 12 - 21.52 mm

For higher floor structures
of up to 180 mm

Hollow profile, therefore
more lightweight and
more economic

TL-4010

1.0 kN Top Mount and Windscreen

Innovations Connected.

With the TL-4010 profile we have created a product which is suitable for the most diverse ends. It cannot only be used as a balustrade system, but also as a wind shield or a room partition. With a rail load of 1.0 kN/m, balustrade heights of up to 1297 mm are possible as fall protection. In cases of wind shields without fall protection, even up to 2645 mm can be realised.

As a matter of fact, the profile is suited both for interior and exterior applications. It withstands a linear load of 1.0 kN and is suitable for glazed units with laminated safety glass made of 2 x 8 mm tempered glass and/or laminated safety glass made of 2 x 10 mm tempered glass.

Essential Features

- | 1.5 kN for a building height of 1297 mm
- | Slimline, elegant design and low-maintenance
- | ONLEVEL FLEXFIT Glass Adjustment Tool
- | Drainage holes
- | Top Cover (optional)
- | For glass thicknesses between 12 - 21.52 mm

Partition wall glazing:

Cost reduction -
larger drilling distances

Balustrade:

TL-5010

1.0 kN Top Mount

The One and Only.

The TL-5010 M-profile is the one and only solution for applications on insulated flat roofs and for clamp mounted installation on hollow facades. The mounting post can be adjusted individually. The optimum stiffeners in the profile enable a length of 2.5 metres with only 3 fixing points. This is extremely efficient and cost-saving, especially when it comes to sealing roofs and facades.

As a matter of fact, the profile is suited both for interior and exterior applications. It can withstand a linear load of more 1.0 kN and is appropriate for glass thicknesses between 12 mm and 21.52 mm.

Essential Features

- | Only 3 fixing points required on 2500 mm
- | **ONLEVEL** FLEXFIT Glass Adjustment Tool
- | Extension pin holes
- | Drainage holes
- | Suitable for roof installation
- | Integrated multifunctional sophisticated chamber
- | For glass thicknesses between 12 - 21.52 mm

CONNECT TECHNIQUE STANDARDISED SPECIAL SOLUTIONS.

Standards make our products so much more affordable for all applications. We make things easier and therefore more economic and accessible for everybody. Special applications for which the standard is not enough pose a special challenge. Thanks to our modelling possibilities and component combinations, we can easily meet customisation demands for our façade systems. **CONNECT TECHNIQUE** – standardised special solutions fitting your façade systems. And all this with a customer, quality and price focus – and still precisely tailored to your needs.

SIMPLY ONLEVELLICIOUS.

TL-6000

0.5 kN top mount

TL-6000 - Our Ryu

The U-profile TL-6000 is the big challenger of all aluminum profiles and still has considerable installation advantages. Especially suitable for applications in the private sector and low-traffic buildings. The mounting distances have been increased and also you can use adjustable bolt anchors. Thus, the product is not only cheaper and faster in the assembly, but also the statics has improved significantly.

It can be used outdoors, withstands a linear load of 0.5 kN and is suitable for glass brands between 12 mm and 21.52 mm.

Essential Features

- | Slimline, elegant design and low-maintenance
- | ONLEVEL FLEXFIT Glass Adjustment Tool
- | Drainage holes
- | For glass thicknesses between 12 - 21.52 mm
- | For applications with low loads

TESTED

ONLEVEL GLASSTOP.

The first effective solution against glass slippage while mounting staircases

Wow...another innovative solution from ONLEVEL. So far, there was no standardised protection against glass slippage when mounting the staircase glass profiles. Until now, elaborate auxiliary devices needed to be constructed or even several installers needed to hold the glass in the profile, adjust it, protect it against slippage and fix it simultaneously.

With GLASSTOP, ONLEVEL has once again developed a solution to simplify installation on stairs and gradients which is simple and ingenious at a time.

Simply screw GLASSTOP into the profile and insert the glass. The glass can now no longer slip downwards. Depending on glass dimensions, the installation effort may be reduced by up to 80%. Less installers, increased safety and a well-conceived system behind.

TL-6010

1.0 kN Top Mount

The Mother of Profiles.

The TL-6010 U-profile is not only cost-effective. It is actually the mother of all profiles, or even better: It is the hidden pearl among profiles. The TL-6010 U-profile is completely invisible and in combination with a structural connection profile, its application versatility increases considerably.

As a matter of fact, the profile is suited both for interior and exterior applications. It can withstand a linear load of more 1.0 kN and is appropriate for glass thicknesses between 12 mm and 21.52 mm.

Essential Features

- | Slimline, elegant design and low-maintenance
- | ONLEVEL FLEXFIT Glass Adjustment Tool
- | Top Cover (optional)

LARGER MOUNTING DISTANCES.

Mounting and Innovating.

They are written with capital letters and form part of our philosophy: We look at the product as a whole. Apart from safety and a classical, timeless design, ONLEVEL attaches special importance to assembly costs. We have achieved a continuous reduction of the number of anchors required for a glass support profile. Nevertheless, we have never lost sight of the necessary stability. Each anchor which is no longer required, does not need to be bought and thus saves you a drill hole, and the associated. We have developed an integrated **multifunctional sophisticated chamber** instead which combines exactly these features.

Pay attention to the logo indicating the suitable application types.

TL-6020

1.0 kN Top Mount

Level Up.

The TL-6020 U-profile is the intelligent onward development of the TL-6010 profile. Here the outstanding feature consists in the increase of mounting distances, which now enables the use of the profile also on an anchor bolt without countersunk head. Therefore, mounting the product is not only faster and more cost efficient, but also statics have improved considerably.

It can be used in exterior applications, withstands a linear load of 1.0 kN and is appropriate for glass thicknesses between 12 mm and 21.52 mm.

Essential Features

- | Slimline, elegant design and low-maintenance
- | **ONLEVEL** FLEXFIT Glass Adjustment Tool
- | Extension pin holes
- | Drainage holes
- | For use with Top Cover 3.0 kN
- | For glass thicknesses between 12 - 21.52 mm
- | For applications of 1.0 kN in private areas, the mounting distance amounts to 60 cm

DRAINAGE – BUT NOT A RAIN GUTTER.

If water and cold combine, this can lead to problems when using all-glass balustrades. For this purpose, all **ONLEVEL** glass support profiles are equipped with drainage holes with a distance of 1000 mm between each of them. And we wouldn't be **ONLEVEL**, if we hadn't thought of all sorts of situations. Depending on the season, the balustrade can be subject to the most different influences (e.g.: leaves, sand, dirt).

We offer the only profile of this kind on the market.

ONLEVEL has paid special attention to ensure that the pivot point of the glass is on the same level as the rubber seals – therefore the rubber seals are never directly subjected to an increased or decreased load. As a result, dirt affects the balustrade much less.

TL-6030

3.0 kN Top Mount

Fat Sister.

The TL-6030 U-profile HD is not only cost-effective. There is much more to it. This profile is especially popular for completely concealed installations. When used together with the structural connection profiles, its application versatility increases many times over.

As a matter of fact, the profile is suited both for interior and exterior applications. It can withstand a linear load of 3.0 kN and is appropriate for glass thicknesses between 21.52 mm and 31.52 mm.

Essential Features

- | Slimline, elegant design and low-maintenance
- | ONLEVEL FLEXFIT Glass Adjustment Tool
- | Drainage holes

TL-6140

0.8kN, Top Mount

MADE FOR
SWITZERLAND

Alpine Crosser

The slimline TL 6140 profile was not only conceived for Swiss Confederates or other mountain lovers. The profile is lighter than its predecessor yet remains prepared to cross the Alps as it can withstand extremely high loads. As a matter of fact, we have maintained the bolt anchor as it does not only save hard cash when compared to common countersunk head anchors, but also considerably increases flexibility when mounting.

In addition, this profile was especially designed for non-tempered glass – therefore, problems with glass flatness are now a thing of the past.

Das erste justierbare System für VSG aus Float Glas!

Essential Features

- | Slimline, elegant design and low-maintenance
- | ONLEVEL FLEXFIT Glass Adjustment Tool
- | Extension pin holes
- | Drainage holes
- | For glass thickness 25,52 mm
- | For applications in the public sector
- | max. possible wind load = 2.4 kN/m²
(Details to be found in the structural analysis)

**STATISCHE
BERECHNUNG**
gemäß SIA 261

MADE FOR
SWITZERLAND

Border Crosser

It is a true border crosser as it approaches and exceeds the limits of its load capacity. Slimmer than its predecessor but still rock solid and hard as stone. The adjustable system for laminated safety glass is suited for especially high loads and a true summiteer when it comes to efficient mounting.

The profile was specially designed for non-tempered glass, eliminating all problems related to glass flatness.

The first adjustable system for laminated safety glass made of float glass!

Essential Features

- | Slimline, elegant design and low-maintenance
- | **ONLEVEL FLEXFIT** Glass Adjustment Tool
- | Extension pin holes
- | Drainage holes
- | Covers (optional)
- | Integrated torsionsbox
- | For glass thickness 25,52 mm
- | Max. Mounting distances= 400mm
- | Max. possible wind load = 2.4 kN/m²
(Details to be found in the structural analysis)

TL-6050

1.0 kN Top Mount

Always ON AIR, ON FIRE, ON TOP!

Once again, our Innovation Hotbed has taken up different requirements from construction projects, resulting in the onward development of the TL-6020/6021 profiles and finally a very advanced solution. Always “On Air” when it comes to wind loads, always “On Fire” when improving and simplifying processes – these were the basic conditions for developing the new intermediate size of the ON**LEVEL** TL-6050/6051 profiles.

The TL-6050 U profile can be used for exterior applications. It can withstand a linear load of 1.5 kN and is appropriate for glass thicknesses between 21.52 mm and 31.52 mm.

Essential Features

- | Slimline, elegant design and low-maintenance
- | ON**LEVEL** FLEXFIT Glass Adjustment Tool
- | Extension pin holes
- | Drainage holes
- | For use with Top Cover with 2.0 kN
- | For glass thicknesses between 21.52 - 31.52 mm
- | Mounting distance of 25 cm
- | Profile can withstand higher wind loads

TESTED

TAKE A LITTLE DISTANCE – WITH OUR SPACER.

Hoover Dam is a thing of the past. There is more water on balconies than in the legendary dammed Colorado River. We have the suitable spacer for every profile to keep your feet dry. In addition, our spacers are constructed such as to adapt themselves to all static conditions.

10.6050.500.10

TL-6051

1.0 kN Side Mount

The Evolution Goes On.

The TL-6051 U-profile is the intelligent onward development of the TL-6011 profile. Here the outstanding feature consists in the increase of mounting distances, which now enables the use of the profile also on an anchor bolt without countersunk head. This makes mounting the product not only much quicker and more cost efficient, also statics have improved significantly.

The TL-6051 U-profile can be used for exterior applications. It can withstand a linear load of 1.0 kN and is appropriate for glass thicknesses between 12 mm and 21.52 mm.

Essential Features

- | Slimline, elegant design and low-maintenance
- | **ONLEVEL** FLEXFIT Glass Adjustment Tool
- | Drainage holes
- | Cover (optional)
- | For use with Top Cover 3.0 kN
- | For glass thicknesses between 21,52mm bis 31,52mm

TL-6080

0.74 kN Top Mount

Glass profile on diet.

The TL-6080 U Profile is not only cost-effective. It is also an intelligent onward development of the TL-6020 Profile. In addition, it is much slimmer, has increased mounting distances and an extra low profile height of only 125 mm. Therefore, this product is not only less expensive to mount but also offers your customer an unobstructed view from their balcony.

As a matter of fact, the profile is suited both for interior and exterior applications. It can withstand a linear load of more than 0.74 and is appropriate for glass thicknesses between 12 mm and 21.52 mm.

Essential Features

- | Slimline, elegant design and low-maintenance
- | **ONLEVEL** FLEXFIT Glass Adjustment Tool
- | Top Cover (optional)
- | Extra low profile height of only 125 mm
- | For glass thicknesses between 12 - 21.52 mm

Extra low profile height
of only 125 mm

Hollow profile, therefore
more lightweight and more
economic

TL-6081

0.74 kN Side Mount

Glass profile with slim hips.

The TL-6081 U Profile is the intelligent onward development of the TL-6021 Profile. It is much slimmer and stands out due to its extra low profile height of only 125 mm. What is so special about it is the fact that the mounting distances have been increased. That makes the product much faster and cheaper to mount.

As a matter of fact, the profile is suited both for interior and exterior applications. It can withstand a linear load of up to 1.0 kN and is appropriate for glass thicknesses between 12 mm and 21.52 mm.

Essential Features

- | Slimline, elegant design and low-maintenance
- | ONLEVEL FLEXFIT Glass Adjustment Tool
- | Drainage holes
- | Cover (optional)
- | For use with 3.0 kN Top Cover
- | Extra low profile height of only 125 mm
- | For glass thicknesses between 12 mm and 21.52 mm

Indoor: 91.3521.210.81

TL-6500

0.5 kN Top Mount

The attika model.

The TL-6500 profile is designed to be particularly small and slim. The impressive thing about it is that it withstands such high loads in spite of its reduced model dimensions. The top mount model is especially suited for use on parapet walls.

The profile can withstand a linear load of 0.5 kN and is suitable for glass thicknesses between 10 mm and 17.52 mm.

The world's first adjustable attic system!

TL-6501

0.5 kN Side Mount

The side mounting model.

The TL-6501 is the counterpart to the TL-6500 for side mounting for parapet walls.. With its height of 85 mm, it also has model dimensions and is predestined for glass thicknesses between 10 and 17.52 mm in 0.5 kN applications.

The slimline profile is optimally suited for concrete upstand and is equipped with an extension pin channel and drainage holes.

The world's first adjustable attic system!

PERFECT FIT. PERFECT PRICE.

FLEXFIT is the perfect system for the fine adjustment of glass panes. With FLEXFIT you can adjust any glass pane individually while positioning it up to 34 mm in relation to the vertical axis.

Ready.

With only one simple sliding movement, you can adjust the glass that precisely that 30% less mounting time is required. FLEXFIT is optionally available in all Translevel glass support profiles for thicknesses between 12 mm and 31.52 mm.

Steady.

Standard systems often require installation on both the fall and the balcony sides. FLEXFIT can be handled exclusively from the balcony side. This applies for the entire installation process, by the way, which is not only much safer but also saves you unnecessary expenditures for a scaffold or lifting platform.

Go.

ONLEVEL has developed the practical FLEXFIT system for quickly and perfectly adjusting glass panels: With one single move of your hand, you can adjust the glass with millimetric precision.

Saves 30% of installation time

Installation only
from the balcony
side

BENDFIT

For Bends Better BENDFIT.

BENDFIT from ONLEVEL for 1.0 kN loads is the first standardised product for curved applications developed exclusively for this purpose. With its quality level it is unique on the market and guarantees a trouble-free adjustment to any building.

Essential Features

- | Standard radii tolerances ± 20 mm - on request radii tolerances of ± 2.0 mm possible
- | Standard radii 1500mm - smaller radii on request
- | Profiles can also be used for your own bending procedure
- | Added value and increased accuracy by taking into account the bend loss
- | No surface damages due to bending
- | Quality seal with bending certificate

No surface damages
through bending

Standard radii 1500mm - smaller
radii on request

TOP COVER AND FLOOR CONNECT

The Top Cover Profiles.

The application versatility of all-glass balustrades in diverse construction projects almost equals the variety of the projects themselves. We have developed the Top Cover Profile for a seamless connection to your individual project. This profile can simply be clipped onto all **ONLEVEL** all-glass balustrade profiles and can be used for an almost infinite range of connections. The costs involved are reduced and possible special applications for the connection to your facade or your floor become standardised.

Up to 5000 mm long

Different profiles with different widths for cover plates of different thicknesses

STARTRACK

Clamping Rail for All-Glass Installations and Partition Walls

Outer Space – Endless Widths

We're in the year 2020. These are the adventures of ONLEVEL travelling with its crew to realise new ideas – new products and new systems. Many light years away from the conservative mindset, ONLEVEL reaches galaxies which man has never seen before. There is no easier and faster installation – with this unrivalled safety.

Why is **STARTRACK** not only unique but also the fastest and the most beautiful?

- One: The first completely pre-assembled partition wall system for glass. This greatly reduces the installation effort!
- Two: Integrated glass fixing for glass thicknesses from 8 - 10,76 mm. A pre-assembled rubber seal for all glass thicknesses!
- Three: Integrated seals instead of applying silicone – no more troublesome insertion of rubber seals!
- Four: Fabulous looks – minimalistic, almost invisible glass support rubbers.

Essential Features

- | Top, ceiling and wall mounting
- | Floor-to-ceiling glazings
- | Completely pre-assembled partition wall system for glass
- | Almost invisible glass support rubbers
- | Glass height up to 3000 mm
- | Relation of glass height to width 3:1
- | Do not use outdoors
- | No fall protection
- | Installation with EGS glass 8/10mm and VSG glass 8.76 and 10.76 mm possible

STARTRACK | TOP, CEILING AND WALL MOUNTING

Startrack Glass Profile

- | Including pre-assembled glass rubber profiles and glass fixing parts
- | Glass thickness 8/10, 8.76/10.76 mm
- | Sales unit: 1 piece

Startrack Glass fixation

With the Startrack Glass Fixation product you can fix the glass for a short time in the profile without it falling out or over. With this in place you can insert your cover profile without any additional help. This is an enormous assembly aid which saves time and makes the whole process easier.

PRIVACYSCREENS

Pre-assembled privacy screens

System for use as privacy screens or windshields

Privacy screens for use as balcony partitioning, for roof terraces or as a protective screen in your garden. The first practically invisible system application – with surrounding 50 x 50 mm aluminium profile.

But the best is yet to come: This is the best and most economical system application in the market as there is no system that is faster and easier to mount. It saves you unnecessary frustration and gives you valuable additional time.

With the pre-assembled **ONLEVEL PRIVACYSCREENS**, you save 30 minutes installation time per set.

Main features

- | All systems are pre-assembled. - Installation advantage: saves up to 30 minutes per set.
- | Other dimensions on request
- | Possible colour combinations according to RAL
- | Balcony and/or terrace partitions

LED handrail

LEDs get ready to rumble.

Inspired by the permanent onward development of LED illumination, many new light installation possibilities and applications keep appearing in architecture. Whether discreet, soft or lightfast – LEDs not only stand out due to their amazing unobtrusiveness but also consume less energy, generate less heat and in this way contribute to a sustainable energy footprint.

Essential Features

- | Modern design
- | Available for wall and glass mounting
- | Aluminium and wood
- | Available in RAL
- | Protection class: IP66
- | LED strip: Can be cut to size (every 55 mm)
- | Voltage: 24 V
- | LEDs per metre: 144
- | Beam angle: 80°
- | Dimmable: yes
- | Colour temperature: 4000 K
- | Light colour: Neutral white
- | Rated output per metre: 6 W
- | Luminous flux per metre: 180 lm
- | Light output: 337lm/m
- | Input power: 220-240V AC 50/60Hz
- | 2 handrail holders at 2.5 meters
- | 4 handrail holders at 5.0 meters

1 integrated
transformer every 10 metres

One continuous light strip, no
irritating light spots

The LED strip can
simply be cut to size.

PERFECT PROTECTION.

If you are looking for a simple and elegant corner protection for your glass balustrades, the **ONLEVEL** handrail is the ideal solution.

It can be easily mounted onto different surfaces: from stainless steel and aluminium up to wood – you can design as you like and leave your individual mark on your project.

Essential Features

- | Simple mounting
- | Simple replacement
- | Great variety of materials and colours

LISTEN UP!

THIS IS ABOUT ACCESSORIES!

Everything The Heart Of A Balustrade Builder Could Desire.

ONLEVEL is always striving to speed up your mounting procedure. Who finishes first, can have a break first – or works more efficiently. Our self-developed accessories are a great help for increasing mounting speed. The quality of the products we buy from our suppliers is very important to us. Therefore we only offer Fischer fixing anchors, among other things, products we ourselves have used, tested with our systems, and proven their effectiveness for the professional installer.

ONLEVEL FLEXFIT Tool
90.0100.110.00

The image shows a specialized tool with a long, thin handle and a curved, adjustable head. The head has a circular component with a central screw. The brand name 'ONLEVEL' is printed on the handle. The tool is shown against a dark background.

ONLEVEL Combi-Tool
90.0100.100.00

The image shows a long, thin, adjustable tool with a T-shaped handle at the top. The tool has a small circular component at the bottom. The brand name 'ONLEVEL' is printed on the handle. The tool is shown against a dark background.

ACCESSORIES

ONLEVEL FLEXFIT Tool

| For FLEXFIT Glass Adjustment Tool

Model 0100	Zinc-plated steel
FlexFit	Art. no.
1.0 & 3.0 kN	90.0100.110.00
0.5 kN	90.0100.112.00

ONLEVEL FLEXFIT DEEP Tool

| For FLEXFIT Deep Glass Adjustment Tool
| For TL6040/6041

Model 0100	Zinc-plated steel
	Art. no.
	90.0100.115.00

ONLEVEL Combi Tool

| For FLEXFIT Glass Adjustment Tool

Model 0100	Zinc-plated steel
	Art. no.
	90.0100.100.00

ONLEVEL Glass Stopp

| For applications on stairs
| Includes self-tapping countersunk screws
| Ø 4.2 x 19 mm
| Sales unit: 2 pieces

Model 7009	Plastic
Strength	Art. no.
1.0kN	90.7009.001.41
2.0kN/3.0kN	90.7009.003.41

ACCESSORIES

Rubber seal

Do you want to mount your profiles but not yet the glass?
The construction site is dirty and you would like to save cleaning time?
Then simply use our rubber seals. In this way, for sure no dirt will reach your profile.

| Sales unit: 1 piece

Model 2002/2005		Plastic
Length	KN	Art. no.
2500	1	90.2002.100.60
2500	3	90.2002.300.60
5000	1	90.2005.100.60
5000	3	90.2005.300.60

ONLEVEL Shims

Unique stepped design for a more flexible height and side adjustment

| Suitable for adjustments of 1 - 6.5 mm
| Material: Aluminium
| Sales unit: 20 pieces

Model 7012	Mill finish
	Art. no.
	90.7012.012.10

ONLEVEL Shim

| Material: Plastic
| Sales unit: 6 x 50 pieces

Model 7034	
Thickness	Art. no.
1 mm	90.7034.001.40
2 mm	90.7034.002.40
3 mm	90.7034.003.40
4 mm	90.7034.004.40
5 mm	90.7034.005.40
10 mm	90.7034.010.40

Gap filler

Fills the gaps between two glass panels. Please observe a maximum distance of 30 mm.
However, the rubber seal can also easily be trimmed to the desired length
| Length: 200 mm

Model 7010	
Glass thickness	Art. no.
12-13.5 mm	90.7010.012.60
15 mm	90.7010.015.60
16-17.5 mm	90.7010.016.60
19 mm	90.7010.019.60
20-21.5 mm	90.7010.020.60
24 - 25.5 mm	90.7010.024.60
30 - 31.5 mm	90.7010.030.60

ACCESSORIES

Dispensing device

| For use with mortar (91.3000.010.00)
| Sales unit: 1 piece

Model 3002	Plastic
	Art. no.
Gun	91.3002.010.00
Mixer	91.3002.011.00

Mortar

| For chemical bonding of anchors
| Including 2 mixers
| Sales unit: 1 piece

Model 3000	
	Art. no.
	91.3000.010.00

Anchor hole brush

| For cleaning the drill holes
| Ø 12 mm
| Sales unit: 1 piece

Model 3002	Plastic
	Art. no.
	91.3002.012.00

Cartridge

| For blowing out the drill holes
| Sales unit: 1 piece

Model 3001	Plastic
	Art. no.
	91.3001.010.00

ACCESSORIES

Stainless steel adhesive

Suitable for plug connections (e.g. handrail – handrail support) which are adjusted to each other in diameter.

- | Colour: green
- | Sales unit: 1 piece

Model 7005	
Contents	Art. no.
50 ml	90.7005.000.11

Wood adhesive

Suitable for wooden plug connections

- | Colour: beige
- | Sales unit: 1 piece

Model 7018	
Content	Art. no.
20 ml	90.7018.000.00

Fixing rivet

- | For fixing the handrail support to the handrail
- | Sales unit: 1 piece

Model 1210		
	Art. no.	Art. no.
	91.1210.512.20	91.1210.512.30

Screw

- | For fixing the handrail support to the handrail
- | Sales unit: 1 piece

Model 1190	
	Art. no.
	91.1190.512.20

ACCESSORIES

Stainless steel cleaning set

- | Contents 500 ml
- | Sales unit: 1 piece

Model 7007	
Colour	Art. no.
transparent	90.7007.000.00

Tape 69

Particularly suitable for applications where a transparent, flexible bond is required.

- | Length: 12 m
- | Thickness: 3 mm
- | Sales unit: 1 piece

Model 7025		
Width	Glass thickness	Art. no.
5 mm	8 - 8.76 mm	90.7025.008.03
7 mm	10 - 10.76 mm	90.7025.010.03
9 mm	12 - 12.76 mm	90.7025.012.03
13 mm	16.76 - 17.52 mm	90.7025.016.03
17 mm	20.76 - 21.52 mm	90.7025.020.03

Glass connection mounting tool

- | Sales unit: 1 piece

Model 0100	
For glass thicknesses	Art. no.
8/8.76 and 10/10.76 mm	90.0100.170.08
12/12.76 and 16.76/17.52 mm	90.0100.170.12
16.76/17.52 and 20.76/21.52 mm	90.0100.170.16

POWERSUCKER | SUCTION LIFTER

Power Sucker, black

- | Carrying capacity of 100 kg
- | Plastic handle
- | Lifting direction: parallel
- | 1.9 kg net weight
- | Ø 203 mm suction pad
- | Carrying case included in delivery

Power Sucker		
Diameter	Carrying capacity	Art. no.
Ø 203 mm	57 kg	90.0100.180.08

Power Sucker, metallic

- | Carrying capacity of 100 kg

QUESTIONS BY ARCHITECTS

How do I know which profile (0.74 kN and 3.0 kN) to use?

You can usually determine the type of profile in line with the relevant use categories according to DIN EN 1991-1-1, BS6180 or the relevant country standards. Here you can also find the classification and the required rail loads. This probably makes it easier: As a general guide, you should use 0.36 kN/m in residential buildings, 0.74 kN/m in busy areas such as sales areas and office walk ways and 3.0 kN for venues hosting large gatherings of people.

Starting from which building height is a 3.0 kN profile required?

This depends on the respective use category (0.36 kN for residential buildings, 0.74 kN for sales areas and 3.0 kN for venues hosting large gatherings of people) and on wind load. You usually have a maximum wind load zone of 2, except near coasts or in the mountains. Therefore, you are almost always well equipped with a 0.74 kN system for standard residential buildings.

Which balustrade heights do I have to take into account for which building heights?

This depends on the respectively applicable building regulations of the individual countries and other regulations which may have to be observed (e.g. school building guidelines, workplace ordinance, ...). If the fall height exceeds 12 metres, most building regulations require a balustrade height of 1.1 metres. We generally recommend a balustrade height of 1.1 metres.

Do I have to use a handrail?

According to DIN 18008 and BS6180 you should, though our systems are all tested without handrails, as these improve the performance results of any tests. **ONLEVEL** test under extreme circumstances to ensure real life high performance levels. Pursuant to most country's standards, a corner protection or handrail is always required.

Are the profiles also suitable for use on cruise liners?

Yes, the profiles can be used without any problem on cruise liners.

How can the drainage problem be solved?

All profiles have drainage holes through which any water entering the profile can drain off. We recommend surface mounting onto a sealing/drainage layer. However, if you use chemical anchors, sealing problems belong to the past. In addition, very little water enters our profiles as the rubber seals are only subject to very small load differences. Thanks to the FLEXFIT technology, the pivot point is in an optimum position.

Where can you get the best burger?

Call me now.

QUESTIONS OF INSTALLATION COMPANIES

Why can FLEXFIT be mounted more quickly than other systems?

All systems are always installed and adjusted on the balcony side. This is also much safer. Moreover, you lift the glass only once per profile and not several times. Simply try and see for yourself.

How can I reduce the drilling effort?

For many profiles we rely on anchor bolts. In this way, slight drilling mistakes can be tolerated. We also have suitable applications for the height adjustment in force-fit connections. Simply have a look at our mounting block.

Where do I find the mounting instructions?

Probably everyone has lost mounting instructions. You can find our mounting instructions not only on our website but also printed into the FLEXFIT boxes.

Which advantages does using a Floor Connect or a Top Cover profile entail?

Here nothing else remains to be done for an aesthetic building connection. This standard provides you with a powerful ally for implementing special applications.

How are profiles packed?

We pay special attention to packaging. All visible surfaces are protected by a film. Additionally, the profile is packed in a sturdy box.

Which distance needs to be observed between the aluminium profiles due to thermal expansion?

Please have a look at the following link: http://www.onlevel.com/en_US/service/brochures-catalogues/mounting-instructions

Which distance should be observed between glass panels?

Please keep a maximum distance of 30 mm, otherwise you will need an edge protection!

WE'RE ONLEVEL. YOU'RE ON FIRE.

Let's Do It!

We're **ONLEVEL**. This is not just a slogan. This is our philosophy. This is the way we work. For you! For keeping you "on fire" about mounting, quality and design.

We're Onlevel. You're On Fire.

As you know: Mounting our products is considerably quicker and easier. In addition, they are available in all reasonable shapes and the installation is as easy as can be, so that you save time and money. And what about the design? You have seen it for yourself. Additionally, it is precisely tailored to your needs, as **ONLEVEL** will prepare everything according to your wishes and preferences. Simply get in touch with our Service Team. Then the spark will jump over to you ...

ABOUT THIS CATALOGUE

Print-related colour variations are possible. ONLEVEL GmbH & ONLEVEL Ltd. do not assume any liability for printing errors or other mistakes in this catalogue. Industrial property rights, such as patents, samples or design patents are registered or pending for numerous products – also by third parties.

© Copyright by ONLEVEL - All parts of this catalogue (texts, images, etc.) are protected by copyright. Any use outside the narrow limits of copyright law are inadmissible without the written consent of ONLEVEL GmbH & ONLEVEL Ltd. This is especially applicable to reprints, reproductions, translations, microfilming and data saved and processed in electronic systems. Time of printing: August 2021

GENERAL TERMS AND CONDITIONS

1. Scope

The present General Terms and Conditions shall apply to all products and services distributed by ONLEVEL, including application-oriented advice and consulting. In case products are mounted by the customer's employees, additional, partially different or extended conditions, having priority over this General Terms and Conditions, shall apply. For all other cases, solely the present General Terms and Conditions shall be applicable. ONLEVEL shall not accept any adverse or deviant conditions of the customer without explicit written consent. The present General Terms and Conditions shall apply even if services are delivered without reservation in the knowledge of conflicting conditions of the customer or conditions of the customer that deviate from this General Terms and Conditions. The present Conditions are only applicable for companies, legal entities of public law and special funds under public law. They shall be valid in the respective current version for all future business transactions with the customer.

2. Contract, Reservation of Changes, Minimum Order Value, Quotation Documents, etc.

2.1 All information and specifications in catalogues, flyers or other documents are non-binding. Contracts between ONLEVEL and their customers are accepted via order confirmations sent by ONLEVEL in written or electronic form, by email or fax. The order confirmation is decisive for the content of the contract. If ONLEVEL delivers services without prior order confirmation, the contract shall be deemed effective upon the beginning of the service or delivery of the ordered goods.

2.2 If the ordered goods are no longer available or have been replaced, ONLEVEL reserves the right to deliver deviant products of the same or improved quality.

2.3 The minimum order value for export orders is £ 1,000. For orders of a value between £ 500 and £ 1,000 a processing charge of £ 100 will be added. Spare parts and services are exempt of minimum order value.

2.4 ONLEVEL retains all property rights, copyrights and other protected rights to submitted quotations, cost estimates as well as drawings, figures, calculations, flyers, catalogues, models and other documents made available. The above mentioned documents shall not be made available to third parties without explicit written consent. This applies in particular to confidential documents.

3. Prices, Terms of Payment

3.1 If not indicated otherwise in the order confirmation, all prices are quoted "ex works" Emmerich/Manchester, plus VAT. Shipping and freight charges, insurance, taxes, packaging costs and possible installation costs are not included. Starting from an order value of £ 10,000.00, shipping charges shall not apply, except for deliveries by a forwarding agent. If the order value is below a net product value of £ 250, a handling fee per shipment of £ 30 shall apply.

3.2 Changes to catalogue prices are reserved. The respective list prices at the time of the order are binding. Modified prices shall be considered accepted if the customer does not object immediately after receiving the order confirmation.

3.3 The purchase price is payable either in advance (wire transfer) or by irrevocable, confirmed letter of credit issued to our indicated bank, unless indicated otherwise in the order confirmation. All bank charges outside Germany are for the account of the customer. ONLEVEL covers all bank charges inside the UK. If the customer is overdue in making the payment, ONLEVEL is entitled to demand default interest of 5% above the current bank lending rate in the UK. ONLEVEL reserve the right to prove and assert greater damages caused by such default.

3.4 The customer shall only be entitled to withhold or offset payments, if counterclaims are having the force of law or are undisputed.

3.5 ONLEVEL reserve the right to supply their goods only on pre-payment or by cash on delivery.

3.6 ONLEVEL is charging the first 3 deliveries to new customers by payment in advance.

4. Delivery, Delivery Time

4.1 All deliveries shall be made „FCA, Free Carrier“ Budberger Stree 5, Emmerich (8, Alexandria Court, Manchester) according to Incoterms®2020.

4.2 Partial deliveries are permissible if not all ordered goods are available and in so far as the customer can be reasonably expected to accept such partial deliveries.

4.3 Delivery dates and times are only binding if they are explicitly confirmed in writing as binding between ONLEVEL and the customer.

4.4 Agreed delivery periods are extended by a reasonable period of time - also within primary delay - in the event of unforeseeable impediments, Epidemics, pandemics, epidemics, diseases or quarantine measures that are beyond the control of ONLEVEL, regardless of whether the impediments are suffered by ONLEVEL or their suppliers. In this case, both parties shall be entitled to terminate the contract.

4.5 Decisive for the observance of the delivery date is the day when the (partial) delivery is made available for collection or shipment or the day when the goods are handed over to the forwarding agent.

5. Transfer of Risk, Shipment

5.1 All deliveries shall be affected at the expense and the risk of the customer, without prejudice to whether the shipment of the goods to the customer has been organised by ONLEVEL. This is also applicable if shipping charges are omitted. The transfer of risk shall take place once the goods have been handed over to the forwarding agent or, in the event of collection, to the person responsible.

5.2 If the customer delays in accepting the service or infringes other cooperation duties, the risk of accidental loss or deterioration of the goods will pass to the customer at the moment in which his delay in acceptance commences.

5.3 The selection of the mode of despatch, packing and shipment shall be reserved to ONLEVEL. The customer cannot derive any claims from the selection made by ONLEVEL.

6. Packaging

In compliance with the packaging ordinance, all packaging materials are to be disposed of in a recyclable and environmentally friendly way. If the customer himself carries out the disposal, ONLEVEL cannot be held liable for the resulting costs. If the customer sends back the packaging material to ONLEVEL for disposal, the despatch shall be done at the customer's expenses; any packaging material reaching ONLEVEL with the postage unpaid, shall be refused.

7. Return of Goods

7.1 Goods ordered incorrectly or in excess can be returned by the customer only after acceptance by ONLEVEL and as long as the goods have not been used, are in their original packing and in good and resalable condition. The return of goods will be charged with 20% of the net invoice amount, minimum £ 100.

7.2 Return consignments are mandatorily required to have a return reference number affixed to them and cannot be accepted without this number.

7.3 Return consignments shall only be taken back if their acceptance has been previously agreed in writing with ONLEVEL.

7.4 Return consignments shall only be accepted if the reasons for their return are indicated upon returning the consignment including a return reference number.

8. Warranty

8.1 If ONLEVEL can be held responsible for defects in the purchased goods, ONLEVEL reserves the right to choose between remedy of defects and replacement delivery. In the event of remedy of defects, ONLEVEL shall bear any and all resulting costs and expenses, especially transportation, travelling, work and material expenses, to the extent that these expenses are not increased because the goods have been transported to a place other than the place of fulfilment.

8.2 Should ONLEVEL not be willing or not be able to remedy the defect or make a replacement delivery, the customer is entitled to withdraw from the contract or demand an appropriate reduction. This is also applicable if remedial action is delayed beyond reasonable periods on grounds for which ONLEVEL can be held responsible.

8.3 Claims for material defects are subject to a limitation period of 12 months beginning with the transfer of risk.

8.4 The customer's warranty rights are subject to the customer's due compliance with inspection and notification stipulations in accordance with § 377 HGB (German Commercial Code).

8.5 Any and all illustrations, indications and descriptions in illustrations, flyers,

catalogues and advertisements are approximate in nature and cannot be regarded as quality description. Such indications are only binding if they have been expressly agreed to define the quality of the goods.

8.6 All technical data, especially information on dimensions, have been thoroughly compiled. They comply with the current state of the art at the time of publication. Changes might result from necessary technical amendments. Liability for damages caused by wrong dimensions is expressly denied. Production-related deviations in measures, contents, weights and colours are permissible within the scope of normal industry tolerances. All published and distributed technical data, explanations and instructions concerning conditions of use and installation, are to be observed by the customer.

8.7 Only surface damages, such as dents, scratches, bubbles, or similar, which are visible from a typical usage distance, can be accepted as grounds for complaints. Typical usage distance means 3 m in indoor areas and 5 m in outdoor areas. Differences in colour and texture are technically unavoidable on powder coatings and anodised surfaces and can therefore not be regarded as grounds for complaints.

9. Advice

If application-oriented advice by ONLEVEL staff is required, this advice always complies with the current state of development. The advice will be given by qualified ONLEVEL staff or authorised ONLEVEL partners observing the principles of proper execution of work. The selection of the appointed employees and service partners is reserved to ONLEVEL.

A guarantee of successful performance is not given - unless agreed otherwise in writing - as the successful performance depends on different factors which are not verifiable through application-oriented advice. The advice does not exempt the customer from testing the suitability of the product for the intended purpose and processes.

10. Liability

10.1 ONLEVEL shall be liable:

- a) for damages caused intentionally or by gross negligence by the company itself and their legal representatives or agents,
- b) according to the prevailing product liability law,
- c) for injury to life, physical injury or damage to health which ONLEVEL, their legal representatives or agents are to be held responsible for.

10.2 ONLEVEL is liable in case of minor negligence if they, their legal representatives or agents violate an important contractual obligation (cardinal obligation), fulfilment of which is essential for due implementation of the contract and which the contractual partner can reasonably expect to rely on. Otherwise there is no liability in case of minor negligence.

10.3 In the event of property damage and financial loss, the liability of ONLEVEL for minor negligence is limited to the typical, foreseeable damage. Liability is excluded for any other remote consequential damages.

11. Retention of Ownership

11.1 ONLEVEL retain ownership of the delivered goods until complete fulfilment of all obligations resulting from the business relationship with the customer.

11.2 The customer is entitled to sell goods subject to retention of title within the course of ordinary business; however, the customer hereby assigns to us in advance any claim to the amount of the invoice total (including value added tax) of our claim which the customer may have against his clients or third parties; irrespective of whether the goods subject to retention of title were resold without or after processing. The customer shall remain entitled to collect this claim even after assignment. The authorisation of ONLEVEL to collect the debts themselves, shall remain unaffected. However, they undertake not to collect the claims as long as the customer meets his payment obligations, is not in default of payment, no insolvency proceedings are instituted over his assets or payments are suspended. In this case, the customer shall be obliged to disclose to ONLEVEL the receivables assigned and their debtors, give all information required for collection, surrender associated documentation and notify the debtors (third parties) about the assignment.

11.3 The customer is entitled to process the reserved goods. The authorisation ends with the definite suspension of payments or if insolvency proceedings are instituted over the customer's assets. Any processing or transformation of the goods is always done for ONLEVEL. If the reserved goods are processed with other objects, ONLEVEL shall be entitled to co-ownership of the new object in a ratio equal to the value of the deliverables to the other goods that were processed at the time of processing. For the object arising from such processing the same applies as for the goods delivered subject to retention of title. If the goods supplied under reservation of title are inseparably combined or mixed with other goods not belonging to ONLEVEL, then ONLEVEL shall acquire co-ownership of the new item created in the ratio of the value of the goods, delivered subject to retention of title, to the value of the other goods combined or mixed at the time of mixing. If mixing is performed in such a manner that the item of the customer is to be regarded as the principal item, then it is deemed agreed that the customer transfers to ONLEVEL a proportional co-ownership. The customer shall hold the sole or joint ownership for ONLEVEL.

11.4 If the customer defaults in payment or fails to fulfil his obligations under the retention of ownership, ONLEVEL may set a reasonable extension of time for performance or subsequent performance. In the event of this period expiring without result, ONLEVEL shall be entitled to withdraw from the contract and to take back the delivered goods. For this purpose, the customer shall send an accurate statement of all goods that have been delivered to him subject to retention of ownership, separate the goods and hand them over to ONLEVEL. After a warning with a reasonable time limit, the goods may be sold for the best possible price on the open market, setting off the price charged to the purchaser.

11.5 The customer is obliged to treat the purchased item with care; he is especially obliged to insure it sufficiently at his own expense against fire, water and theft damages to the replacement value. Should maintenance and inspection work be necessary, the customer must perform such work in good time and at his own expense. Seizure or other third party interventions are to be notified immediately in writing.

11.6 Upon request, ONLEVEL shall release the delivered goods subject to retention of ownership and items or claims that have replaced them, in so far as the realisable value of the securities exceeds the obligations to be secured by more than 20%; ONLEVEL shall be responsible for the selection of securities to be released.

12. Data Protection

The customer acknowledges that, Data Protection Act, personal data obtained from the contractual relationship are stored by ONLEVEL for the purpose of data processing. No data will be passed on to third parties.

13. Place of Performance, Court of Jurisdiction, Applicable Law

13.1 At the option of ONLEVEL, the place of performance shall either be the competent court of jurisdiction for the ONLEVEL headquarters or the customer's headquarters, in so far as the customer is a merchant, an entity of public law or special funds of public law.

13.2 The place of performance for delivery shall be the place where the goods are stored for the purpose of being despatched or handed over to the customer. The place of performance for paying the purchase price and for fulfilling all other contractual obligations shall be Emmerich/Manchester.

13.3 For all legal relationships and disputes between the contractual parties arising from this contract, the English Law of Contract shall apply exclusively, excluding the UN Sales Convention.

**ONLEVEL BALUSTRADES –
Start a View Beginning**

We are enthusiastic as this is our passion:
We develop and manufacture the best fall
protections and room dividing systems
made of glass.

We are always striving for innovation in
order to live our passion. Our high quality
standards form the basis of our ambition.

The people we share this passion with are
highly motivated, enjoy and give trust. As
all of us know this, our products are that
innovative, safe and transparent. Or simply
cool.
